VISUAL COMFORT & CO.

SIGNATURE COLLECTION

Our story has always been about the power of lighting to illuminate, to cast light on both the physical & artistic qualities of a space. Great lighting is additive. It's about brilliance—design & creativity, craft & technology, style & value. We combine innovation & tradition, creators & makers, & all the layers of light that add up to functional & beautiful spaces. We are committed to offering every form of lighting for every type of environment to create a complete experience of Visual Comfort. This is our purpose, as we constantly work to provide a full spectrum of designer lighting to fit all our customers' needs.

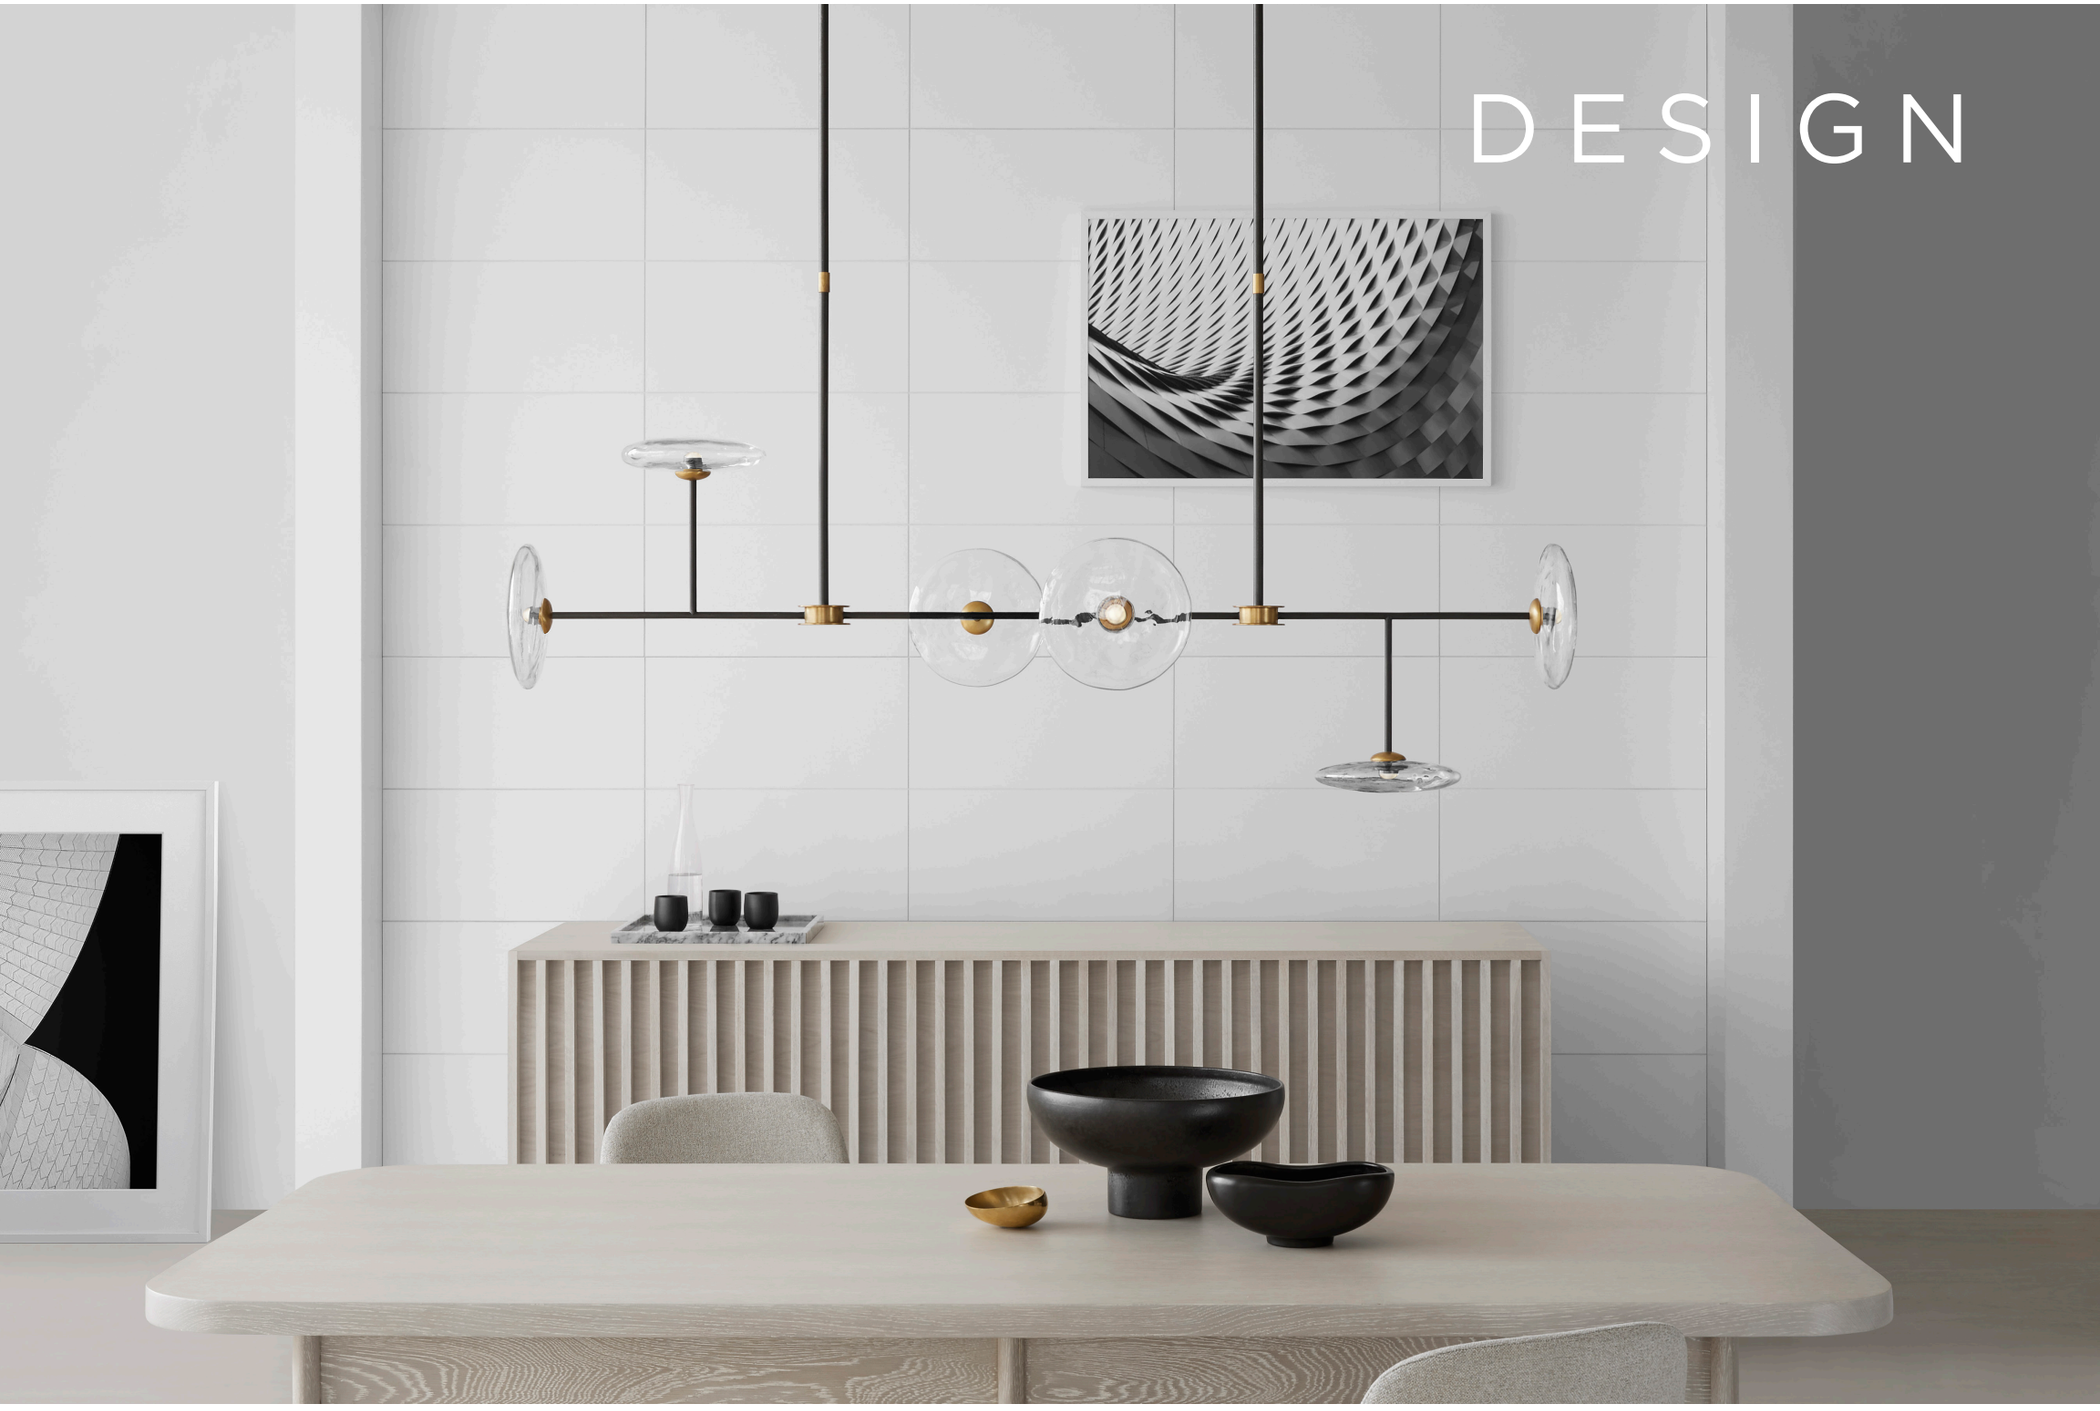

As we've grown, Visual Comfort & Co. has become home to the world's most expansive selection of premium lighting & fans. We are one company, one source, & one brand—tirelessly building on the promise that still rings true in the name of our original business. We've organized our vast portfolio into a series of curated collections that make it easier to find the product, style, & price range you want for any size & type of project. It all begins with this chapter, where we started—our flagship Signature Collection of exceptional & inspired decorative lighting, celebrating the past, present, & future.

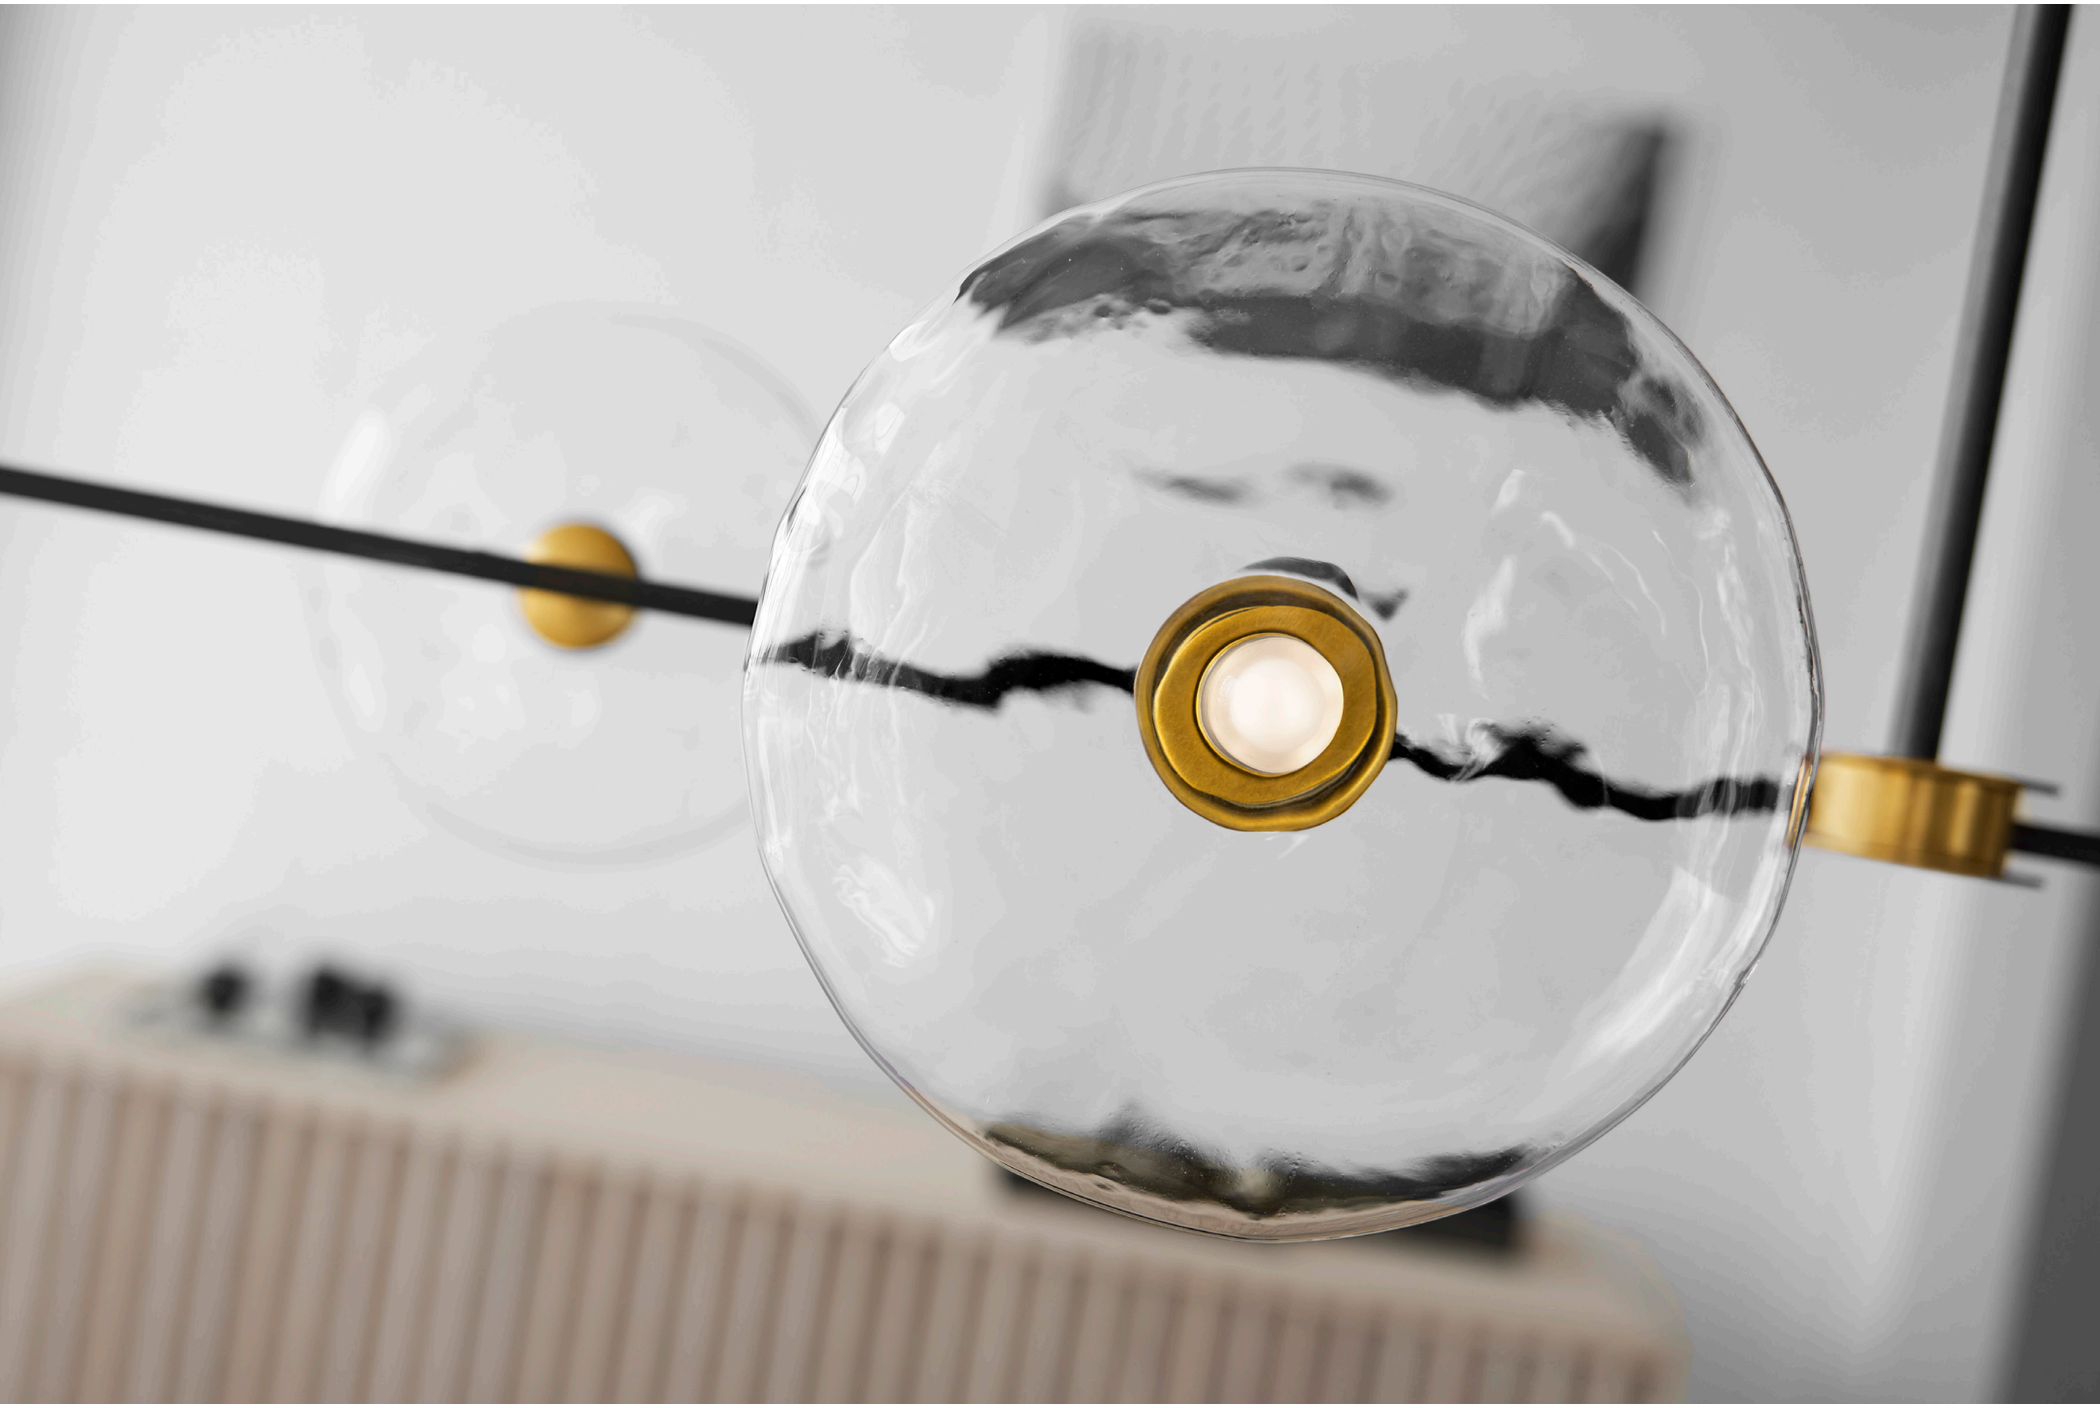

SIGNATURE COLLECTION

For many years we've shared the literal definition of *Visual Comfort* as the basis of why we make lighting—"the collective impression of good lighting as it relates to quantity, distribution, & quality of light." We celebrate the design of light for what it makes possible & how it looks while doing so. Very few design elements bring as much life, function, & visual transformation to a room.

Throughout the history of our Signature Collection, we've delivered this sensory experience with the highest caliber of creative excellence, designer partnerships, style selection, & always impeccable craftsmanship. Good lighting is just as rooted in an artistic definition—our signature best, sophisticated designs, embodied with the beauty of form to fully enlighten any space.

ALFRED STIEGLITZ

DESIGN

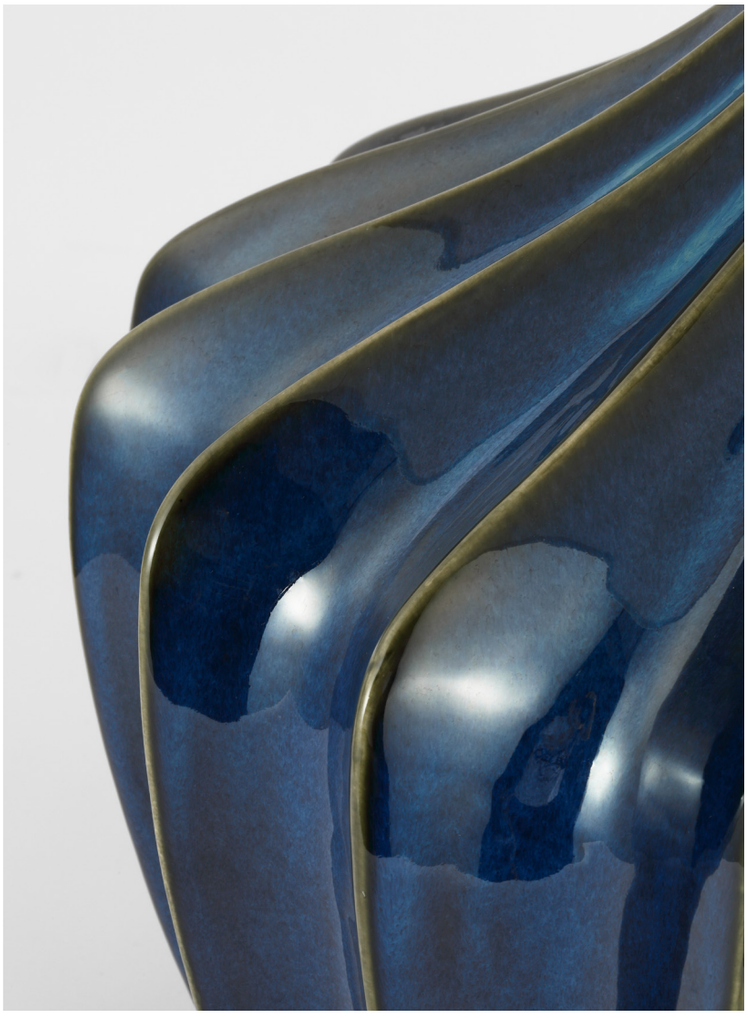

CREATIVITY

Creativity is the foundation of any product we make as a design company. For our Signature Collection, that means an unwavering commitment to encourage the endless possibilities that come from the varied & vivid imaginations of our talented family of designers.

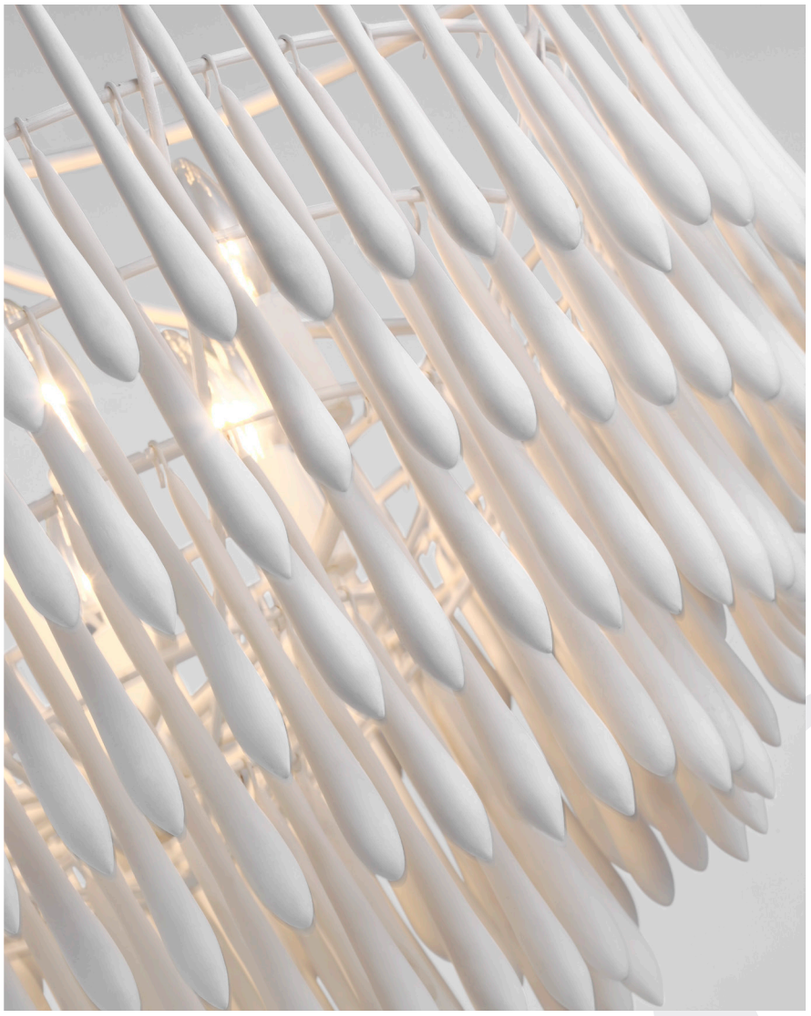

We enrich those ideas & embody them with an ever-growing range of vibrant materials, exquisite finishes, & proprietary detailing through both age-old & modern techniques. Light becomes part of our palette as we create more ways to deliver it in luminous works of art.

COLLABORATION

We are proud to create our Signature Collection in collaboration with the industry's most accomplished family of esteemed designers. Each one translates their own memorable style & unique interpretations of form into luxurious lighting that spans across the classic to modern spectrum.

CRAFTSMANSHIP

MANUFACTURING

Lighting is an intricate, technical product made with machinery. We are proud to achieve an uncommon level of bespoke quality with our production methods by also entrusting highly skilled artisans to work on each piece. The result is that each light feels made by hand.

FORM

The most complex silhouettes & turns of form are possible thanks to the full sculptural craft we apply to every profile. Our artisans can perfect any shape, in a wide range of materials, with expert & patient technique.

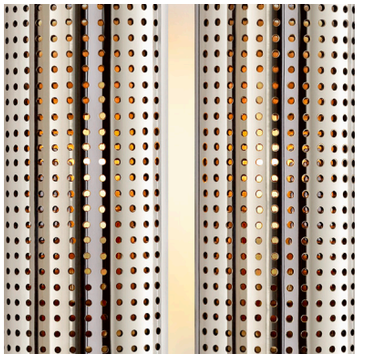

DETAIL

Detailing is one of the dimensions of our lighting where the sum is truly greater than the parts. Attention to each surface of every fitting makes the difference between the ordinary & extraordinary in our collection.

CHARACTER

We think of character as a beacon that guides the integrity of each light. Our goal is always to realize exactly what our designers envision & to fabricate that with total consistency from one piece to the next.

PERFORMANCE

As our craft capabilities grow, we can render both the finest vintage techniques & newest technologies with an eye to better performance. Modern requirements are an intrinsic part of how every light works.

FINISHES

From our earliest pharmacy lamps to our current array of lighting, we've always insisted on the artistic importance of authentic finishes in our palette. We treat every metal & material like it's part of a luxurious piece of jewelry. This range of color can dramatically change the look & feel of a product.

METALS

We embrace the rich character of metals. From cool chrome to warm nickel, golden & antique brass to bronze, iron, & steel, every finish can be selected to express a chosen style, from traditional to modern.

MIXED METALS

A signature element of our collection is the way we combine mixed metals. Two-tone, light to dark, or used as an accent in gold or silver—to achieve the desired effect requires technique & expert skill akin to fine tailoring.

PATINA

There’s something to be said for the perfect imperfection. The patina of an antique lamp or fixture links us to great lighting history & traditions. Our proprietary, patinated finishes feel genuine & warmly aged, adding a unique character that makes each light a one-of-a-kind original.

COLOR

From gilding to glazing, from warm to cool materials, we use traditional techniques to achieve wonderful subtleties of color—in every finish & across the collection. This variation lends depth & delicacy to our palette.

TEXTURE

Brushing, burnishing, forging, honing, hammering, & polishing are just some of the methods that we can apply to the surface of a finish, letting each one tell a unique story. Our variety of nuanced textures is unrivaled.

MATERIALS

In our Signature Collection, variety comes not only from the many designer perspectives we offer, but just as importantly, from the widest, elite range of materials we source. Wood, stone, glass, metal, fiber, & more—from natural to precious elements, premium choices for premium lights.

OLD WORLD MATERIALS

Lighting is a discipline that carries a great deal of tradition. From its industrial origins to its potential as a sculptural medium, we're naturally drawn to classic, old world materials.

Glass is a prime ingredient in much of our lighting, not only for shades but for bases & chandeliers. We work with countless types of glass—strié to seeded, hand-blown to cast.

Wrought iron, gold leafing, cast plaster, & ceramics share a history with folk traditions of basketry & time-honored uses of fiber. We employ linen, silk, paper, rattan, & abaca for our shades.

We also look to multiple cultures with influential lighting traditions. From Scandinavian & Japanese paper lanterns to Venetian blown glass, we are inspired to interpret it all.

TECHNOLOGY

As a design-driven collection, we not only wish to preserve the classics, but we also want to look forward to designs that can express the times we live in—including energy conservation. We interpret many of our more historical styles with new technologies, in simplified forms.

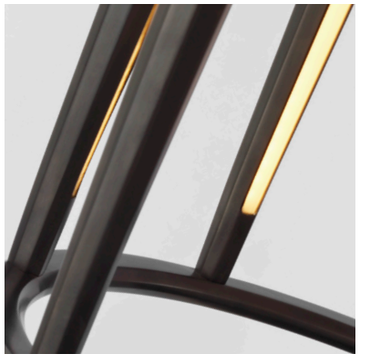

NEW WORLD TECHNOLOGY

One of our favorite design approaches is to embed modern technology in traditional forms. An alabaster dome can emit a warm glow with a cool LED light inside, mixing past & present.

Vintage & European modern lighting offer ever-popular, iconic profiles that are already hallmarks of a spare, aerodynamic style—perfect forms to merge with new smart technologies.

As in our Modern Collection, we are inspired by all the new options made possible by lightweight & cordless elements. A classic caged fixture now illuminates from the outside in.

Tubular metalwork & globelike spheres can take on a new character when programmed as softer, more ambient light installations—becoming just as artful as they are practical.

STYLE

APPLICATION

For every single place where a fixture or lamp casts light, we pride ourselves on having many different styles to fit the bill. A ceiling light could be a chandelier, a pendant or a hanging shade. It could live in a townhouse, a lake house or a mountain retreat. The possibilities are limitless.

TRADITIONAL

We look to the conventions of formal architecture to interpret many worlds of timeless sophistication.

MODERN

We think modern means simpler, edited forms that celebrate geometric shape, pure line, elegant mass, & sculpture.

CASUAL

We take an eclectic, easy approach to casual design—farmhouse, cottage, & coastal inspirations are timely & familiar.

RUSTIC

Our favorite rustic environments are organic & elemental, with simple pleasures from the natural world.

SELECTION

We talk a lot about selection across our entire portfolio. In our Signature Collection, selection includes every decorative layer of light in a space, in many varieties & styles. Where our quality is singular, our range is maximal, providing you with every possible combination of light.

FLOOR TO CEILING

As an architectural shorthand, we live the words floor to ceiling literally, every day. From floor to desk & table, wall sconce to ceiling light, we can outfit any space top to bottom, in a single or mixed style.

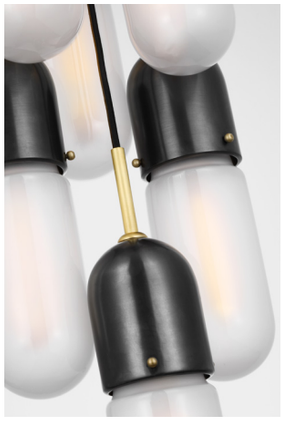

THE KINFOLK TABLE
Bernd and Hilla Becher

VARIATION

Part of lighting variation is about choice—in aesthetics & materials, in scale & configuration. Another part is about the ease of specification across an entire project. That means designing how lighting will work with other elements, & helping you make harmonious decisions.

CLEAR & FROSTED

Many of our glass components come in clear & frosted finishes. The same is true of many bulbs. We consider the full effect of the light—opacity helps with concealment; transparency opens & lightens a space.

ANTIQUE & POLISHED

Both antique & polished finishes can be quite evocative of designs from the same or different eras. This finish choice tends to be about matching the style & visual imprint of the surrounding architecture, old or new.

SINGLE & MULTIPLE

The same light can have a vastly different effect when used in a singular form, or in an ensemble. Choose a solo piece to spotlight a space or create intimacy; experiment with multiples of a light for scale, rhythm, & drama.

FUNCTION

We're always mindful that lighting is a product with a practical function in a space—to illuminate, whether in a soft & sunny wash or more task-driven brightness. It's no surprise that we focus on how the simplest features can coalesce into the most hardworking lights.

PURPOSEFUL

At the desk or bedside, or just beside a sofa, a dedicated, directional light source is essential for reading & work. The same is true for the specificity of purpose in the even light around a bath mirror or vanity, or any product with a wet room application.

ADJUSTABLE

Sometimes a light that can move with you is best. Articulated elements & adjustable brightness on lamps, sconces, even chandeliers, can let you position the light where you want it, so that it becomes a responsive & dynamic part of your space.

VALUE

Signature value is the promise we make to our customers. It's the expression of our highest standards, as we bring together the best of design from different perspectives, in a kaleidoscope of styles for every application. We started with a vision of great lighting. We pledge that our integrity & quality will endure.

INSIDE

We go deep inside each detail to create lighting of true character, where every element counts, whether it can be seen or not. That shows in the ways our lighting is noticed in many types of interiors, contributing quality as well as function to every environment.

OUTSIDE

A handsome pair of lanterns at the front door. A large pendant over an outdoor dining area. Exterior lighting is now a complete extension of interior styling. We also know its value as we design it to last for years, meeting strict weather & technical requirements.

RESOURCES

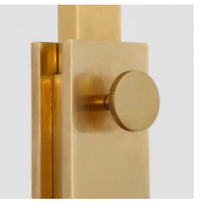

SIGNATURE FINISHES

Our “living” finishes make the difference for lighting choices that are unique in personality / design appeal. We use authentic natural materials to give our products their custom character: brass, bronze, nickel, silver / chrome in antique / polished lusters; classic enamels, ceramic, porcelain / gilding; forged irons / honed woods; hand blown glass; rock crystal / alabaster; elegant parchment papers, silks / linens.

Our selection of more than eighty finishes is a central part of our promise to serve all aesthetic preferences / design applications in our lighting. These abundant options can help you adapt your favorite lighting profiles to the right mood for your project. From the superior quality of our Hand-Rubbed Antique Brass / Polished Nickel to the perfect elegance of Gilded Iron / Antique Silver Leaf / many more casual / painted finishes in between, we have the look that will help you create your own lighting décor.

CARE INSTRUCTIONS

All products should be cleaned and a soft, dry cloth or duster. Our products should never be sprayed and a cleaning solution or polish. When it is necessary to use a cleaning agent, please apply only a mild deteregent to a soft, damp cloth for gentle cleansing. Do not use scouring agents, abrasive sponges, hydrochloric acid, vinegar, ammonia, petroleum distillate or metal silicates.

CUSTOMIZATION

Many of our products can be modified in our custom department. Changing height, finish, or switch type on an item can be done upon request.

VARIATIONS

Minor variations may occur in product dimensions and finishes due to the handmade nature of our products. We recommend that designs being purchased in pairs or sets for a specific job be ordered together to ensure they match.
